# microRNA Detection Using small RNA-Seq

microRNA hairpin structure

How to detect and quantify microRNAs using High-Throughput Sequencing.

reference genome

# microRNA locus Leipzig, Germany

Join this hands-on workshop taught by experts in the field. Learn how to use small RNA-Seq to detect/visualize microRNA expression and perform downstream analyses.

ECSEQ

Workshop

8:00 am - 17:00pm

13th - 14th October 2014

**OINFORMATICS** 

## SCOPE AND TOPICS

- Discuss and understand the RNAi pathway
- Understand the method of small RNA-Seq and the problem with mapping short reads
- Learn how to predict new microRNAs using small RNA-seq reads
- perform microRNA gene prediction and downstream analyses
- Interprete the results and extract scientific valuable findings

### SPEAKERS

- Michael Hackenberg (University Granada) Developer of miRanalyzer, one of the most-used microRNA gene prediction tools using small RNA-seq data
- David Langenberger (ecSeq Bioinformatics) Expert in small RNA-Seq data analysis
